A University that Satisfies Students

SCU has invested more than \$10 Million in initiatives to improve the academic achievements of our students as well as our projects to develop educational content, raising the quality of lectures. Students have access to excellent academic services at our offline campuses, which are equipped with the latest amenities and recognized as being among the best academic facilities in Korea.

Korea's Largest e-Learning Studio with Automated Capture System

We opened the e-Learning Studio on April 9, 2012. With 560m² in floor space, the largest facility of its kind in Korea. More importantly, the state-of-the-art capture system automates the recording and editing processes to produce lectures in full-HD resolution. This system has more than tripled the productivity of producing educational materials in video and other media formats, allowing the staff to devote themselves to planning more creative educational materials.

Faculty of World-renowned Scholars

The faculty at Seoul Cyber University includes distinguished scholars who graduated from Harvard and other prestigious universities. One full-time professor is assigned to every 200 students, bringing the ratio of full-time professors and students to the highest level in Korea. In addition, the latest lecture methods, which utilize multimedia materials, deliver great student satisfaction and help build effective communications between professors and students.

SCU Learning WAVE: World's Top-class e-Learning System

SCU Learning WAVE, an acronym for Why, Action, Value and Expansion, is the only e-learning system developed in-house by Korean online colleges. It integrates “dynamism” into the system, a unique way to deliver content beyond the traditional methods. Seoul Cyber University invested two years in planning and developing the SCU Learning WAVE system, which includes three sub-systems and two proprietary content-creating tools. We are the first Korean online educator to adopt the Common Cartridge format, a set of specifications developed as an international standard for exchanging college learning content.

SCU: Korea's First to Win an International e-Learning Award

SCU Learning WAVE earned the Silver Award at the IMS Learning Impact Awards for 2011, an international competition among e-learning providers.

IMS Global Learning Consortium Award Winner

University that sets the Trends

Seoul Cyber University leads educational practices in Korea. We are participating in the ASEAN Cyber University project in collaboration with the Ministry of Education, and our integrated mobile system allows students to access administration services conveniently via smart phone.

ASEAN Cyber University Project

Seoul Cyber University was nominated as the implementing partner in Korea for the ASEAN Cyber University project, an official development assistance initiative in the area of education. The project is supervised by the e-Learning Department of the Ministry of Education. We have been engaged in this project since 2012. The goal is to establish the world's first international higher education institution where the peoples of Korea and the ten ASEAN member-states can attend lectures, earn credits and receive degrees online. Seoul Cyber University is assigned to facilitate credit transfer, develop a high quality of educational content, and to create a collaborative framework for academic exchange.

Integrated Mobile Service

Our Integrated Mobile Service system provides a mobile application and relevant web pages, which were developed in-house, allowing users to access the system by smart phone regardless of their mobile service providers. The system features lecture samples and admission information, improving student accessibility and convenience. The mobile server is synchronized with the integrated information system to allow users to retrieve information on lectures, attendance, and GPAs.

A University that grows through Shared Aspirations

The professors and students, seniors and juniors, and graduates and undergraduates of SCU pursue common values, and SCU is committed to creating the best environment for students to receive a quality education. The truths, taught and shared during college years, help each individual develop a strong sense of justice, laying the groundwork for them to grow as genuine intellectuals dedicated to developing society and themselves.

Academic Programs

1. Undergraduate Program

- School of Human Welfare
- School of Psychology & Counseling
- School of Social Science
- School of Business & International Management
- School of Information Technology & Design
- Department of Culture & Art Management
- Department of General Education

2. Graduate Program

- Graduate School of Human Services
- Graduate School of Counseling Psychology

Free Lectures for Graduates

Students with a bachelor's degree in SCU are welcome to audit two courses per year free of charge.

Campus Tour

Newly enrolled students are introduced to the campus and see first-hand the place where the online content is produced. Tour participants also have an opportunity to meet their professors and chat with senior classmates.

Free Lecture Using the Computer for Beginners

Newly-enrolled students who are new to the computer are welcome to learn how, free of charge.

Local Community Day

A special lecture is offered to students in provincial areas to help them adjust to university life and maximize the effectiveness of their learning.

“Top-tier” Lectures by SCU Chair Professors

The top members of the SCU faculty offer outstanding lectures to new enrollees.

1. Campus tour
2. Free lecture on computer science
3. Home Plus Chairman Lee Seung-Han delivers one of the “Top-tier” lectures.
4. The Tchaikovsky Hall
5. Students attending the degree presentation ceremony
6. Special lecture from the famous alpinist Um Hong-gil
7. SCU Spring Festival

Sister Universities around the Globe

Seoul Cyber University is partnered with renowned universities around the World. We run joint research projects and exchange educational content on various subjects, committed to a constant enhancement of curricula quality. This has helped establish a global education environment where students visit overseas welfare facilities and professors from overseas universities are invited to offer special lectures. These initiatives promote exchanges between professors and students abroad.

- 1. Stockholm University | Sweden
- 2. Far Eastern Federal University | Russia
- 3. Ural Federal University | Russia
- 4. University of Vechta | Germany
- 5. Irkutsk State University | Russia

Sister Universities

- 1. Special lecture by Professor Richard Peiser from Harvard
- 2. Harvard Professor Richard Peiser
- 3. Students participating in a joint seminar

SCU has finalized agreements on academic exchange and cooperation with all of the universities listed. All schools have agreed on mutual development of lecture content, student exchange and visiting faculty, joint research and summer special training in English. Our partnership with Stockholm University also allows for visits to social service facilities in Sweden as well as the provision of special lectures by visiting SCU faculty.

- Mutual Development of Lecture Content
- Exchange Program for Students and Faculty
- Joint Research
- Summer Special Training
- Special Lectures by Visiting Faculty

Ten Reasons to Choose Seoul Cyber University

Seoul Cyber University respects and values people. The broad nationwide network of campuses in Korea, the SCU Mentoring Program, and the free lectures for the alumni promote the ultimate goal of lifelong learning. Various scholarships and the customized, student-centered academic administration system help motivate students. These efforts have paid off. The Graduate School was accredited and established, and SCU was chosen as the best online school by the Ministry of Education.

SCU Mentoring Program
The SCU Mentoring Program has been in place since 2008 with the aim of helping freshmen and transfer students adapt to university life, develop stronger senior-junior relationships, conduct career exploration, create learning roadmaps, and improve basic learning skills.

- 1. Students listening to lectures via smart phones
- 2. The commencement ceremony of the NLP Practitioner Course
- 3. Students participating in a special lecture
- 4. Special lecture by Prof. Anita Nyberg of Stockholm University in Sweden

- **Best Online University Selected by the Ministry of Education**
Seoul Cyber University passed the strict evaluation criteria set by the Ministry of Education and won the title of The Best Online School in 2007.
- **Graduate School of SCU – One of the Best Graduate Schools in Korea**
The Graduate School of SCU has two of the most popular programs selected by students—the School of Human Services (social welfare program) and the School of Counseling Psychology (counseling psychology program).
- **Access to Lectures Via Smartphone while on the Move**
The SCU Learning Wave, a patented next-generation online education system, enables students to attend as well as listen to lectures via smart phones.
- **Korea's Nationwide Campus Network**
SCU operates eight campuses including the Intelligent Campus, the biggest campus network among all Korean online universities.
- **Customized Academic Administration Support System**
Teaching assistants and academic advisers are assigned to each department to provide one-to-one customized service to students, from admission to graduation. In addition, the one-stop counseling service provides prompt and accurate academic administration assistance with students.
- **SCU Mentoring Program**
Senior students mentor freshmen to facilitate their adapting to the online educational environment. The mentees can receive practical assistance for exploring career opportunities and devising study plans.
- **Remote Administration Services**
The 1:1 remote administration services help students resolve any difficulties in taking lectures and using websites.
- **Free Lecture Programs for the Alumni**
SCU allows the alumni to attend up to two courses every semester for free in order to help them improve their competitiveness, realize the goal of lifelong learning, and strengthen the ongoing bond with the school.
- **Offline Special Lectures**
SCU invites chair professors and high-profile figures to offer offline special lectures at campuses across the country. This helps students bond more closely with each other, build relationships, and fulfill intellectual curiosity.
- **Best Scholarship Opportunities in Korea**
SCU offers various scholarship programs for students. As of 2011, 59.7 percent of enrolled students received some kind of tuition assistance.

Happy Campus Life Pursuing Dreams Together with Other Colleagues

SCU maximizes student satisfaction by providing high-quality offline education at nine campuses nationwide. Over 100 student clubs and communities help foster a sense of solidarity. Furthermore, the overseas history and culture excursions and the annual Togetherness Festival promote student pride in the school, helping to facilitate a strong sense of belonging to the university as well as arouse their passion for study.

Offline Education

SCU campuses are located in Seoul, Indeogwon, Chuncheon, Incheon, Bundang, Yeonmudae, Daegu, Gwangju and Busan. They provide venues for various offline gatherings such as special lectures, seminars, and club activities. Students enjoy their campus life beyond the expectation for ordinary online universities.

“Gathering Day” Events at Local Campuses

Gathering Day has been held once a month at a campus other than the main Seoul campus since 2010 as a part of an overall initiative to foster activities at the provincial campuses. The plan was designed to ensure that the provincial campuses are a place where students want to be and where the necessary services are available. On Meeting Day, SCU’s professors give special lectures on a selected theme relating to study as well as counseling services for learning.

Overseas History and Culture field Trip

SCU has promoted various programs for visiting foreign countries with the aim of fostering talented people who are internationally competent with a global perspective, extensive experience, and a progressive attitude. Every year, our students go to governments, enterprises, universities, research institutes, and social organizations that boast world-class expertise and systems. Students also explore heritage sites around the world. In addition, we provide short-term training courses during vacations under agreements with partner institutions such as Stockholm University in Sweden, Jones International University in the US, Colorado Christian University in the U.S., and other prestigious universities.

Cultural Events Covering All Enrolled Students

SCU hosts the Togetherness Festival every year, with around 1,500 students participating in order to strengthen ties among students and foster their love for the school. Also, we continuously offer chances for enrolled, new, and transfer students to enjoy cultural events such as music concerts and movie showings to broaden exchanges among peers.

2012 SCU Spring Festival

Togetherness Festival

A total of 1,500 people including enrolled students and their family members, professors, and staff enjoy cultural events and share their passion in the Togetherness Festival under the theme of “Passion makes dreams come true! Challenge the Future!”

Vibrant Campus Life: Pursuing Dreams with Fellow Students

SCU exceeds the limitations of conventional online universities and allows students to enjoy an active and pleasant campus life with friends. Students are involved in various club activities that are equivalent to those of offline universities so that they can gain experience in areas of shared interest and promote friendships.

The 2012 graduation ceremony

Sharing, Caring, and Unifying Activities

SCU respects the value of people and aspirations for a more caring world. SCU, with the aim of spreading the value of a “world in complete harmony,” is continuously involved in volunteer activities for sharing and caring. During vacation, various volunteer activities were initiated by the voluntary work clubs of SCU. Now, they are being expanded, in terms of scale and the number of participants, to include all enrolled students and graduates. The organizations include the SCU “Beautiful” Volunteer Corps and the SCU Overseas Volunteer Corps. Social contributions by SCU are not only a way to benefit others but also the best way for students to learn to develop their capabilities and realize their goals. SCU intends to expand the scope and scale of voluntary programs advancing our role as a university that contributes to the development of society.

Habitat Korea

The SCU "Love Voluntary Work Team" has participated in the Habitat for Humanity Campaign since 2007. We recently took part in a campaign abroad in the Indang Village in the Philippines.

1. SCU Love Gangwon Yeongdong
2. SCU "Beautiful" Volunteer Corps
3. SCU Overseas Volunteer Corps
4. Happy Together
5. Gathering of Beautiful People

SCU Love of Gangwon-Yeongdong Club

The “SCU Love of Gangwon-Yeongdong” Club was established in 2005 to let students and graduates who had already become involved in society share important information related to volunteer work or employment, as well as to develop and improve themselves. The gathering started for those living in Gangwon province. Many people, however, were attracted to the warmth of the volunteer work, so it expanded to also include the Yeongdong region. Currently, approximately 140 students participate in the club and do volunteer work under the name of “Seoul Cyber University - Love of Gangwon Yeongdong Voluntary Work Team” in cooperation with local social organizations. The club received the Best Club Award for two consecutive years for its continuous and constant efforts and the Excellent Group Award in the Volunteers’ Night of Gangwon Province, which took place in December 2008.

Beautiful SCU Volunteer Corps

“Beautiful SCU Volunteer Corps” was established in March 2009. The title of the team was named after the beautiful intention of the student founder. It is a group of volunteers, including students and graduates of the Department of Social Welfare and other departments. They have continued volunteer activities, practicing the true meaning of their learning and providing a helping hand to others. Also, the team engages in activities to create jobs, find potential venues for practical training, and help the marginally poor. SCU students across the country do community service in nearby areas. In addition, the group offers scholarships for the enrolled students from low-income families.

SCU Overseas Volunteer Corps

“SCU Overseas Volunteer Corps” participates in the Habitat for Humanity Campaign led by Habitat Korea, engaging in activities to offer comfortable residences for all. The team has built about 40 houses under voluntary home-building campaigns promoted by Habitat Korea. Furthermore, the team has visited villages located in remote areas in the Philippines, Ethiopia and other countries in order to support local residents to enjoy modern conveniences.

Happy Together

“Happy Together” is a volunteer group formed by the students of the Social Welfare Management Department on June 20, 2009. Since its first gathering, it has engaged in volunteer activities once every month. The group welcomes not only enrolled students but also graduates, and it helps to strengthen relationships among seniors and juniors. Professors of the department are also deeply engaged so that the students and professors jointly lend a helping hand to people in need. This has been a great pleasure for all.

To Be a Specialist

Fostering Experts who Respect the Value of People and Learning

The SCU Graduate Schools of Human Services and Counseling Psychology provide students with in-depth and professional programs. We believe that learning should be based on people and that the ultimate goal of learning is to make people happier. This belief is broadly implemented in our various academic and practical activities.

● Human Services / ● Counseling Psychology

GRADUATE PROGRAMS

Graduate School of Human Services

Human Services

Missions to Conduct the Light to the World

The Department of Social Welfare in the Graduate School of Human Services is dedicated to cultivating professional social workers who are skilled in both theory and practice, and capable of meeting the expectations and demand of an aging society. The degree coursework includes three tracks: Study of Social Welfare and Services, Practice and Application of Social Welfare and Services, and Establishment and Operation of Social Service Organizations. Students are offered multi-disciplinary and in-depth educational content in each track. One can acquire practical and professional knowledge that is relevant in the field of social welfare and strengthen occupational capabilities by taking these courses in stages.

http://gwelfare.iscu.ac.kr

Graduate School of Counseling Psychology

Counseling Psychology

Professional Counselors Contributing to Sustainable Development

The Department of Counseling Psychology cultivates creative counseling professionals who can help others adapt to society and solve their psychological problems by engaging in systematic and multi-faceted research on education processes. The department runs two specialized tracks to produce professional counselors with profound expertise in their respective areas.

http://gcounsel.iscu.ac.kr

Educational Goals of the SCU Graduate School
Nurturing talented people who contribute to realizing a sustainable society is the educational goal of Seoul Cyber University. This goal is based on the educational ideas and philosophy of the Shin-il Educational Foundation (ethics, integrity, independence, and originality). It incorporates the educational ideas stated in relevant laws and the needs of the contemporary society. We aim to foster comprehensive experts who are well equipped with personal qualities of ethics, integrity, and social responsibility and who are able to respond proactively to and suggest solutions for many challenges arising in an aging society.

- Four Educational Goals of the SCU Graduate School**
- 1. Practical training programs linked to the field
 - 2. Multidisciplinary, integrated education
 - 3. Education of global excellence by building an international network
 - 4. Reinforcement of ethics contributing to the community

Preparation for Leadership

Education Cultivating the Talented People the World Requires

The sixteen departments of the six schools of SCU provide systematical education courses that help foster students' ability both in theory and practice. Students can obtain certificates and pursue in-depth learning during the terms. Our education approach is focused on promoting creativity and ability to apply knowledge in real life. Seoul Cyber University goes beyond others toward cultivating the talented people that the modern society needs.

*Undergraduate School

- Culture & Art / ● Human Welfare
- Psychology Counseling / ● Social Sciences
- Business & International Management / ● Information Technology & Design

UNDERGRADUATE PROGRAMS

Culture & Art

Culture & Arts Management

Placing a Bridge of Communication between the Audience and Culture

The Department of Culture & Arts Management aims to cultivate professionals in the field of arts and culture management, who mediate the entire process of art production, from the creation to the distribution and reception, as well as systematically and efficiently manage the relevant projects and initiatives. The goal of this course is to produce experts who can understand both art and management and play various roles in areas such as performing arts planning, theater management, arts administration & cultural policy, cultural event planning, directing arts & cultural films, and directing cultural events. Ultimately, this is expected to help create demand for performing arts and other cultural events as well as expand the supply of quality content, ultimately raising the overall quality of Korea's arts & culture to the next level.

<http://artmanage.iscu.ac.kr>

Human Welfare

Social Welfare

Social Welfare Experts Cultivating Happiness

The study of social welfare raises questions on the quality and conditions of the individual and social well-being in the context of the challenges arising from modernization, industrialization, and urbanization, and seeks practical answers for these questions. The educational focus of the Department of Social Welfare is on teaching students advanced social welfare theories, and conducting studies on theories and methodologies for providing social welfare services for the disabled, local communities, children, women, youth, the aged, as well as implementing social security programs and social welfare policies. The Department is also focused on cultivating social welfare experts equipped with practical skills.

<http://welfare.iscu.ac.kr>

Social Welfare Management

Cultivation of Professional Managers of Social Welfare Facilities

SCU's Department of Social Welfare Management is providing students with both general knowledge on social welfare and business administration strategies. The department aims to produce professional managers of social welfare facilities who can establish and operate those organizations with proper knowledge and skills. As such, students can learn the proper leadership and attitude of a CEO, as well as the practical skills for the successful management of welfare facilities based on up-to-date theories about social welfare organizations. These programs will help the potential CEOs of welfare facilities identify relevant strategies for the sustainable management of the organizations in the changing social welfare environment. Moreover, we provide students with opportunities to acquire social work and other certificates that are required for them to play a role as a competent manager of the facilities.

<http://swm.iscu.ac.kr>

Child Welfare

Fostering Students to Instill Dreams in Children, The Future of Our Society

The issue of child welfare has become increasingly important in the recent years, with experts suggesting that the level of the child welfare system is indicative of social progression, or lack thereof. The Department of Child Welfare aims to foster child welfare specialists by instilling the fundamental principles of ensuring that children are respected by their family and society and that their rights to health and happiness are protected. The program consists of courses on child and family welfare, child development, child welfare policies, child and family counseling, childhood education and more to ensure that students can gain the expertise they need to become competent professionals in this field.

<http://scuchild.iscu.ac.kr>

UNDERGRADUATE PROGRAMS

Human Welfare

Youth Welfare

Cradle of Youth Welfare Specialists,
Promoting Healthy Adolescent
Development

The Department of Youth Welfare equips students with theoretical and pragmatic knowledge and techniques regarding integrative intervention and activities by individuals, households, schools and society as well as culture and human rights that are relevant to youth. By taking a multi-disciplinary and convergence approach, the department fosters students into visionaries and progressive thinkers in the field of youth welfare.

Elderly Welfare

Home of Experts Taking the Initiative
in an Aging Society

The SCU Department of Elderly Welfare is focused on cultivating competent professionals to work in the various fields of elderly welfare as well as preparing students to start and manage senior businesses. To this end, the department provides students with professional knowledge, practical skills and relevant training opportunities in the context of senior welfare, physiology, and psychology as well as in the social, industrial, and public policy aspects for the aged.

http://youth.iscu.ac.kr

http://elderly.iscu.ac.kr

Psychology & Counseling

Counseling Psychology

Counseling Professionals Equipped with
Systematic Theory and Practical Skills

The coursework of the Department of Counseling Psychology is designed to nurture psychological counseling professionals who help people cope with various stresses and conflicts in human relationships. The curriculum includes basic and advanced psychology, theories on counseling psychology, and the practices of counseling therapies. These programs enable students to prepare for the exams for various certificates such as counseling psychologist, youth counselor, and clinical psychologist. Upon the acquisition of the Bachelor's degree in counseling psychology, graduates are offered the certificate of completion for the child counseling course by the President of SCU.

http://counsel.iscu.ac.kr

Family Counseling

Experience of Changing Family Relationships
through Self-improvement

The goal of the Department of Family Counseling has been set to ensure students improve themselves and ameliorate family relationships through education. The education courses consist of basic theories of counseling psychology and advanced theories of family counseling. The full-time faculty members are supervisors of major academic societies and associations so that students can learn practical lessons as well as theoretical approaches.

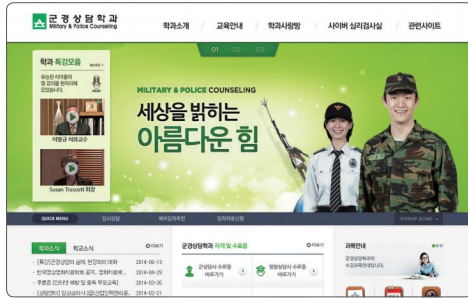

http://family.iscu.ac.kr

Military & Police Counseling

Cultivation of Specialized Counseling
Experts

The need has been growing for psychological counseling services to serve those with potential problems and those considered to be "seriously unfit" for military service and police organizations. Aware of this need, the Ministry of Defense is indeed recruiting specialized counselors to assist those on active military service and those in the National Police Agency. In response, the Department of Military & Police Counseling offers courses on special counseling programs targeting the problems and issues unique to these institutions, and general psychological counseling programs related to human relationships and organizational management. Upon the completion of the designated courses, students are eligible for various counseling certificates, including those for military counselor, police counselor, youth worker, youth counselor, social worker, and psychological counselor.

http://mpcounsel.iscu.ac.kr

UNDERGRADUATE PROGRAMS

Social Sciences

Real Estate Management

Specialized Experts Corresponding to the Rapid Change in the Real Estate Market

The real estate market today requires specialized professions in the rapidly changing environment due to the complete opening of the market, ongoing specialization of realtors, the convergence of the real estate and finance market, the customer-oriented transition of the market, and other trends. The Department of Real Estate Management provides students with general knowledge on real estate and relevant basic theories in various disciplines such as economics, finance, law, and urban planning. Practical studies are also taught, including development planning, management of properties, and real estate investment. The Department has developed these comprehensive and balanced curricula to foster real estate experts equipped with both theoretical knowledge and practical skills who can deal with the 21st-century global real estate market.

http://estate.iscu.ac.kr

Law & Public Administration

Leaders in Creating Practical Value in the 21st Century

The Department of Law and Public Administration combines the two disciplines in a practical way so that students can learn broader knowledge and grow as leaders who create value in the 21st century. The department provides student-centered learning by helping students prepare for the acquisition of various certificates and obtain broader relevant knowledge through the combined program. This will ultimately result in better performance on the job and lead to good chances to proceed to graduate schools.

http://lawadmin.iscu.ac.kr

Healthcare Administration

Globally Competent Healthcare Administration Experts Contributing to National Health

The Department of Healthcare Administration is committed to nurturing creative professionals in healthcare administration in order to enhance the health level of the general public as well as to contribute to the development of the Korean healthcare industry. It will give students the capabilities needed to deal with the new digital paradigm of healthcare and medical services in the 21st century. The Department runs the curricula that combines lectures from renowned scholars both home and abroad, and education on practical skills. These programs enable students to qualify as globally competent healthcare administration professionals who are able to respond proactively to the emergence of U-health and other rapid changes in the healthcare environment as well as meet the requirements of the profession efficiently.

http://health.iscu.ac.kr

Business & International Management

Business Administration

Business Leaders the Globalized World Requires

The educational goal of the Department of Business Administration is to nurture professional managers and global business leaders who boast top-notch competitiveness in the 21st century. We provide students with quality education on the latest business theories and future-oriented business practices so that they can deal with new trends and changing business paradigms. Business management seminars featuring professional managers are also provided, giving students a sense of how real business works. The nationwide alumni network covering the Korean business circle allows students and graduates to collaborate practically and strengthen the relationships between seniors and juniors.

http://biz.iscu.ac.kr

International Trade & Logistics

Experts in International Trade and Logistics Commanding Global Leadership

The paradigm-shifting trends of globalization, online conversion and convergence are now challenging the conventional concepts of trade and logistics. Responding to these trends, the Department of Trade and Logistics developed a comprehensive curriculum integrating the three key study areas (trade practice, international business, and logistics management) to create a unique course in Korea. This integrated program enables students to grow in terms of leadership and global competency. The Department is committed to nurturing genuine experts in trade and logistics by providing them with practical knowledge required in today's electronic trade, the global perspective corresponding to the globalized market, and the theoretical knowledge and practical skills in the management of logistics and distribution networks, which are crucial to national competitiveness.

http://etrade.iscu.ac.kr

Finance & Insurance

Cultivation of Professional Financial Experts

The Department nurtures integrated financial experts who are able to adapt to and take the initiative in the various financial market environments proactively so that they are recognized in the financial markets home and abroad. To this end, the Department provides students with theoretical knowledge and practical skills in terms of finance covering banking, securities, insurance and other financial sectors, and enables them to incorporate these areas.

http://money.iscu.ac.kr

UNDERGRADUATE PROGRAMS

Information Technology & Design

Computer Engineering

IT Experts in the Era of Technology Competition

The Department of Computer Engineering provides education on theories and practical skills in computer hardware and software, IT technology, security systems, application services, and other key technologies needed to take the lead in the 21st century, the so-called “era of ubiquitous access.” In addition, the Department also provides online education programs for the acquisition of national technical qualification certificates and encourages students to proceed to graduate schools. These activities are intended to produce technical professionals in the future.

http://cic.iscu.ac.kr

Multimedia Design

Leading Designers Commanding Creativity and Professionalism

The educational goal of the Department of Multimedia Design is to nurture computer graphic (multimedia content) design experts befitting the 21st century through communications among people, imagination, and culture. To this end, the Department teaches ways to express sentiments, computer technologies, and creativity enhancement methods and pursues individualization, professionalism, and diversification in order to strengthen those directions. Basic courses (level-adjusted courses), expert skills courses (advanced courses), and club activities are provided in consideration of the demand of the multimedia industry in the future. Our graduates will grow to be recognized on the actual job as creative and professional design leaders befitting the 21st century.

http://multi.iscu.ac.kr

New Media Contents Technology

Creative Professionals Playing a Pivotal Role in the Future

The new media content industry is estimated to have great growth potential as the distribution of the internet is increasing and several Korean companies have taken the initiative in setting global technological standards. Responding to these trends, the Department of New Media Content Technology has developed a curriculum aimed at enabling students to adapt to the one-source-multi-use environment prevalent on various new-media platforms. The Department nurtures creative personnel that can build diverse systems corresponding to various platforms from planning to services. The graduates meet the potential demand for media, content, broadcast, video and other sectors, acting as the key personnel in the future industry.

Plan Your Life Realize your dream

Seoul Cyber University pursues the true virtues of 21st century education.
The place for learning and forging a better future in an ever-changing world.
We provide the tools to overcome global challenges.
SCU nurtures creative talent through an innovative academic environment.
Grow as a leader of the times by accepting ambitious ventures and making a distinctive commitment.
We want to shape and share your life and dreams.

This logo contains the letter “A,” or “Alpha,” from the Greek alphabet.
It also combines the Chinese characters “人” and “一”, which are taken from “信一” (i.e. Shin Il).
The result is a symbol that represents the educational ideals of the Shin Il Educational Foundation:
commitment, quality and achievement inspired and undergirded by faith.
