Introduction of Undergraduate Program (English Course)

Software Engineering

○ Training of field experts for S/W development in the era of the fourth industrial revolution

Overview

- Customized education for IT Software Development
- From software used in computers and mobile devices to various IT industries, i.e. Internet of Things(IoT), robot, drones, autonomous vehicles, and environment-friendly energy.
- Training of experts for developing IT software program and the future high-tech industry

Career Development

- IT/multimedia solutions, internet applications, and computer programs
- Development of applications for smartphones and digital contents for learning
- Job opportunities in corporations and institutions in various fields, i.e. game industry and data processing

※ The below program including other competitive undergraduate programs will be opened soon.

Blockchain

○ Training of field experts for blockchain in the era of the fourth industrial revolution

Overview

- Customized education for blockchain technology
- Step-by-step curriculum starting from the background of blockchain and cryptocurrency and its structure and type of blockchain.
- Practical knowledge required in the blockchain industry
- Development of the blockchain industry by training for expert and leaders for the future

Career Development

- Field experts in the blockchain industry
- Further study by enrollment in the graduate school of information security, engineering, and others.
- Job opportunities in private and public IT-related corporations.

Software Engineering Curriculum

Academic Year & Course Type		Name of Course	Semester	
			1 (Sep)	2 (Mar)
1	Major Studies	Python Programming		O
		Korean Language (Basic)	O	
	Liberal Arts	The 4th Industrial Revolution in a Historical Perspective	O	
		Korean Society and Culture	O

		Korean Language 1		O
		Basic Mathematics		O
		Introduction to Korean Socio-economic Development		O
		World Civilization		O
2	Major Studies	C Programming 1	O	
		Discrete Mathematics	O	
		Operating System	O	
		C Programming 2		O
		C++ Programming 1		O
		Data Structure		O
	Liberal Arts	Korean Language 2	O	
		Business English (Advanced)	O	
		Korean Language 3		O
		Basic Statistics		O
3	Major Studies	C++ Programming 2	O	
		Java Programming 1	O	
		Algorithm	O	
		Database	O	
		Java Programming 2		O
		C# Programming		O
		Software Development		O
		Computer Architecture		O
	Liberal Arts	Korean Language 4	O	
		Korean Language 5		O
4	Major Studies	System Analysis and Design	O	
		Human and Computer Interaction	O	
		Game Engine (Unity)	O	
		Network Programming		O
		Software Engineering		O
		Mobile Software Development		O
	Liberal Arts	Korean Language 6	O	

※ The curriculum is subject to change

Courses for IT Certificates	
CLA	C Programming 1, C Programming 2
CPA	C++ Programming 1, C++ Programming 2
OCAJP	Java Programming 1, Java Programming 2

1. Quality

Our on-line courses are taught by outstanding professors from prestigious universities.

2. Virtual Campus

Learning can extend beyond the barriers of time and space for your convenience.

3. English

Curriculum and all courses will be provided in English.

4. Culture

Students can experience our Korean language program.

5. Opportunities

For students who achieve academic excellence can participate in:

- short-term attendance course at the main campus in Seoul, Korea
